

**RACQUETBALL EYEGUARDS [Updated: July 4, 2009]**

According to the manufacturer, the following models of protective eyewear meet ASTM impact standards (F 803-XX) for racquetball, as specified in USAR Rule 2.5(a). The ASTM standard cited in Rule 2.5 addresses the impact resistance of the tested eyeguards **as a unit**. This means that **both** the lens and frame **in combination** must meet the cited safety standard. For those who must wear corrective lenses, it is **not** acceptable to merely have impact resistant lens material placed in everyday, fashion eyeglass frames. *IMPORTANT NOTE: USAR is awaiting manufacturer statements of ASTM compliance for those new items that are highlighted in **YELLOW** below.*

**KEYS TO SPECIAL FEATURES:**

- (RX) = Accepts prescription or plano lens;
- (A) = May be worn by youngsters through adults;
- (C) = Designed for head size of children;
- (O) = Designed to wear over RX eyewear
